The F-10 flightCASE provides protection to your exhibition stand & other goods.

The F-10 flightCASE is available as a ready-to-use unit or alternatively as an easy-to-assemble kit of 6 side panels and click-on clips for a no-tool assembly.

The bulky edge-modules and the high-end wheels provide a high impact strength, and the self-assembly option allow for easy shipment of an empty case.

The modules, panels and assembly elements are manufactured at our factory in Denmark on very short lead times.

Special demands are possible. Any color on edges and panels are available at request.

## Technical information:

- Modular in 10 cm steps.
- Length 30-240 cm. Width 30-120 cm. Height 30-120 cm.
- Edge elements: Durable EVA/HDPE foam rubber.
- Panels: 9 mm Birch ply-wood. Painted on outside.
- Hinges and snaplocks: ABS plastics.
- Handles: Ø 8 mm zinc plated steel.
- Wheels: Ø 100 mm double ball bearing PUR tracks.

**Pricing:** A simple price calculator in excel format is available at request, for easy pricing.

Danish design. Made in Denmark. Patent no. 001066500
